

WHY SHOULD YOU BUY THE TC26-NI?

TC26-NI Touch Computer is the ultimate cost-effective touch computer for your business in hazardous areas.

If you are considering purchasing low-cost mobile phones for your workers in hazardous areas, step up to the TC26-NI Touch Computer – without stepping up in price. You get all the right business features you need to improve workforce productivity and task accuracy, reduce total cost of ownership and increase return on investment. You get the right features, the right ruggedness, and the right accessories, all at the right price.

TOP 3 CUSTOMER BENEFITS

SO MUCH MORE THAN A CELL PHONE

With support for Zebra's industry-leading Mobility DNA, the TC26-NI from Bartec offer value well beyond a mobile phone. Many powerful complimentary Mobility DNA tools are pre-loaded and ready to use, making it easy to get your devices up and running, capture and send data to your apps, keep your devices secure, and more. The included Mobility DNA Enterprise License unlocks additional voice and data tools, taking voice functionality and productivity to the next level - and making it even easier to secure and manage devices.

ACCESSORIES TO MAKE YOUR WORKERS MORE PRODUCTIVE

With an unmatched enterprise accessory family, you can create the perfect mobility solution for your needs. Easily manage any size device pool in any environment with single and multi-slot device chargers. There's a snap-on/snap-off trigger handle for more comfortable scanning. And more.

GUARANTEE SECURITY EVERY DAY YOUR DEVICE IS IN SERVICE

You are investing in a device that you plan to keep in the hands of your workers for years to come. The TC26-NI offers the lifecycle you need. Available with Android 11 today, the TC26-NI provides built-in support for a future Android release. And Zebra's Life Guard™ for Android provides up to six years of security updates for Android.
