

## Successful partnership for over 25 years

*For more than 25 years, BARTEC and Zebra Technologies have worked in close partnership. At the LogiMAT trade fair, they will jointly present their versatile and innovative product portfolios. In special focus: Pixavi Phone with new Scan Module.*

**Bad Mergentheim, 25 April, 2023.** When LogiMAT, the international trade show for intralogistics solutions and process management, opens its doors on April 25 in Stuttgart, the exhibitors will also include two special partners: BARTEC and Zebra Technologies, who have written a successful joint history with different products over the past three decades in the field of high-tech and explosion protection.

„We are very happy to share the latest development of our long standing partnership with Zebra Technologies’ OEM team: the scan module for the Pixavi phone. BARTEC’s long standing partnership with Zebra Technologies ensures our customers can benefit from decades of experience in the explosion protection market, and from the focus on state-of-the-art solutions and industry leading performance,” says Andrej Sonkin, SVP of BARTEC Business Unit Enterprise Mobility.

The current focus at LogiMAT is the Pixavi Phone with a new scan module for outstanding and safe scanning capabilities in hazardous environments. This special collaboration between BARTEC and Zebra Technologies gives customers the option of using a highly ruggedised and intrinsically safe, yet sleek, elegant and light phone for scanning. For extra user comfort, the Pixavi phone with scan module can also be used with an ergonomic scan handle. The Pixavi Phone looks like a standard smartphone, but with its integrated cutting-edge scanning technology, it guarantees top performance, safety and reliability and is certified for use in ATEX/IECEx Zone 1/21.

„Zebra’s partnership with Bartec means together, we have provided an outstanding portfolio of solutions for over 25 years, leveraging Bartec’s market-leading experience in the highly specialized, intrinsically safe mobile computing product market. Partnerships last this long for a reason, and we’re excited to continue to offer our customers our joint best-in-class solutions,” says Richard Thompson, Sales Vice President, Global OEM Zebra Technologies.

In addition to the Pixavi Phone with scan module, other solutions on display from Bartec’s range of intrinsically safe handheld computers and barcode scanners include the MC93 ultra-rugged mobile computer, MC27 and TC77 mobile computers, and the BCS3600 handheld scanner.

## PRESS RELEASE

The two partners will continue to work closely together in the future and jointly bring further innovative and high-tech solutions to the market. We will keep you up to date!
